

Teacher Pre-Test

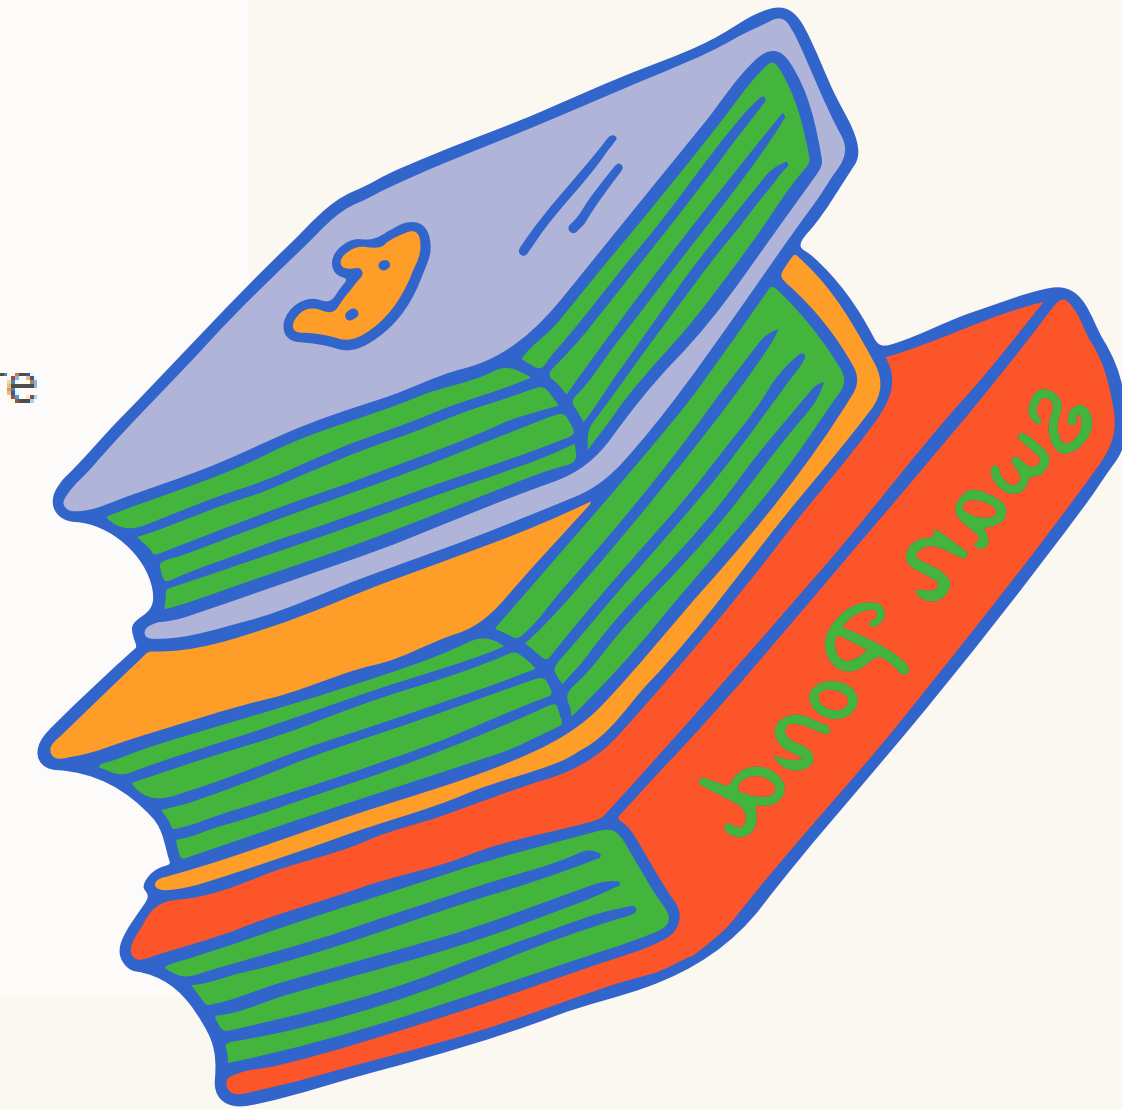

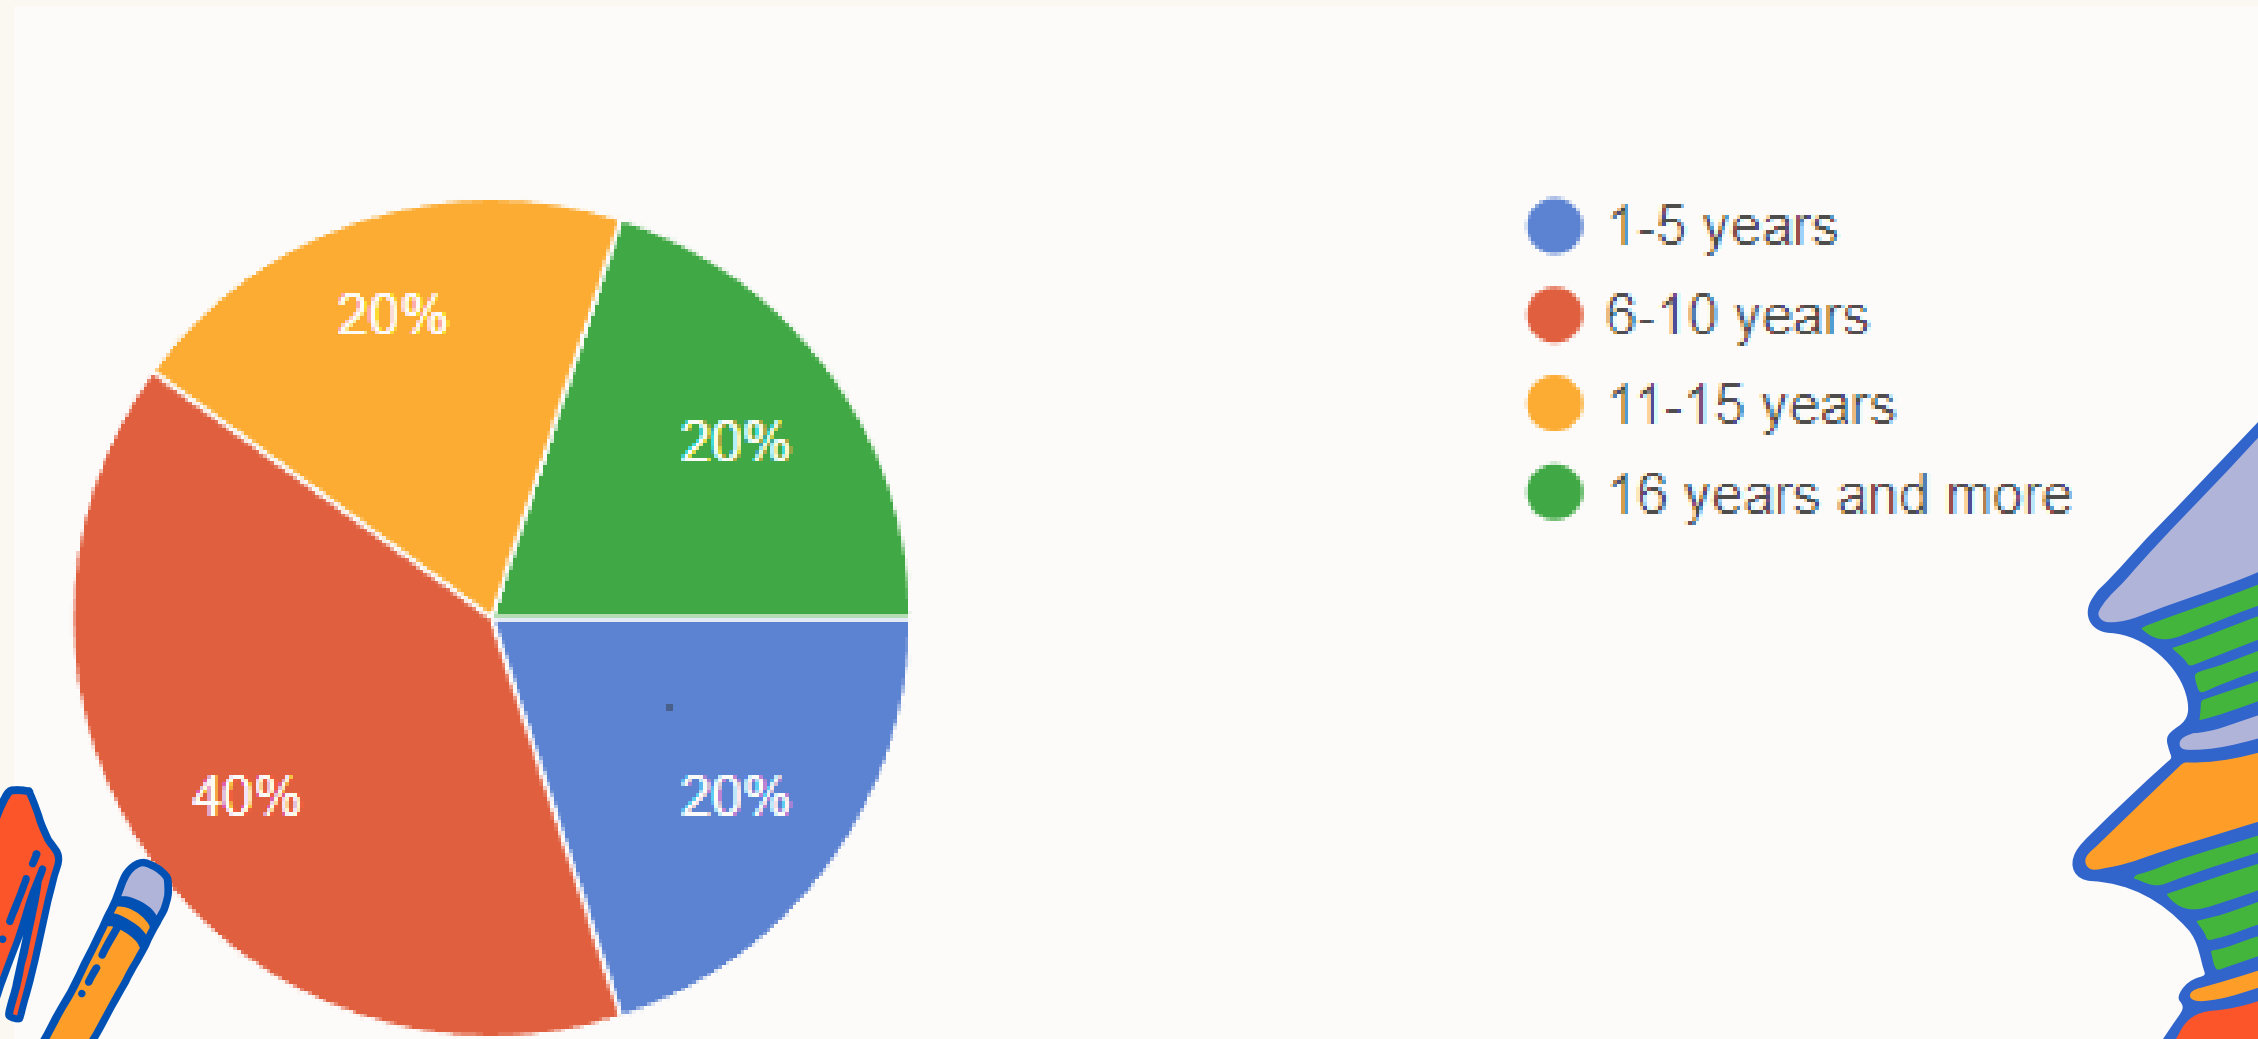

Maths with

Games

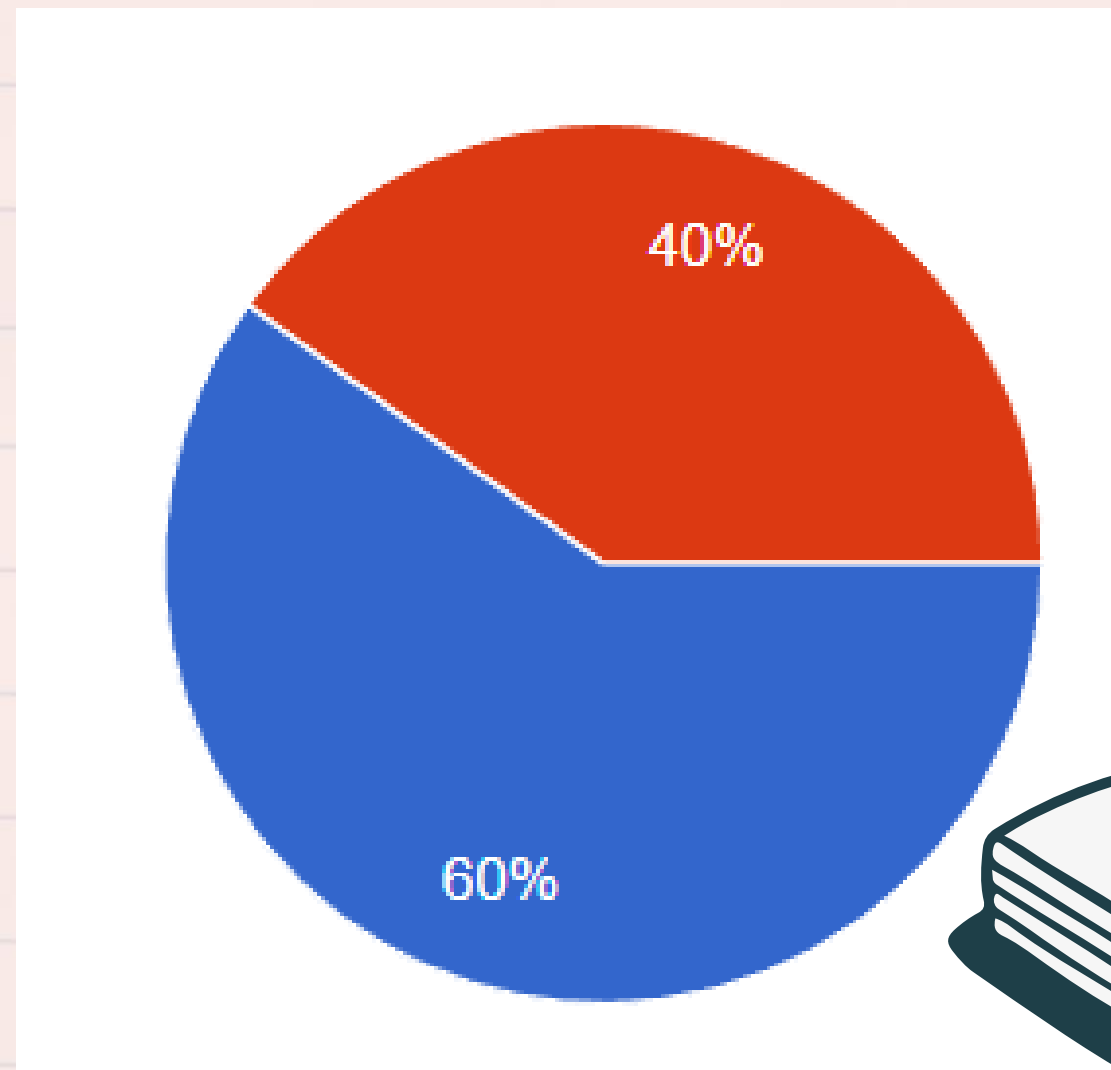

How many years have you been a teacher?

Have you worked on an eTwinning project before?

- No, This is my first project.
- Yes, I worked on other projects before.

Do you think the project will contribute to student success? How do you think this project will benefit students?

Yes, I think my students will develop a positive perspective on mathematics. You will learn how to use technological tools, meet students and teachers from other nationalities and feel happy.

Thanks to the project, students will learn to design avatars, logos, posters and tangrams. They will also use their creative skills when designing games. And they will socialize by communicating with foreign partners.

I think that the project will make mathematics fun for the students and this will lead to a better understanding of them

I think the project helps students to develop essential skills that are valuable both academically and in their future life.

This project improve my students to learn foreign languages and to apply on maths

I think, thanks to this project, my sense of creativity will improve, I will start speaking English better, and I will also have the opportunity to see the methods of different teachers.

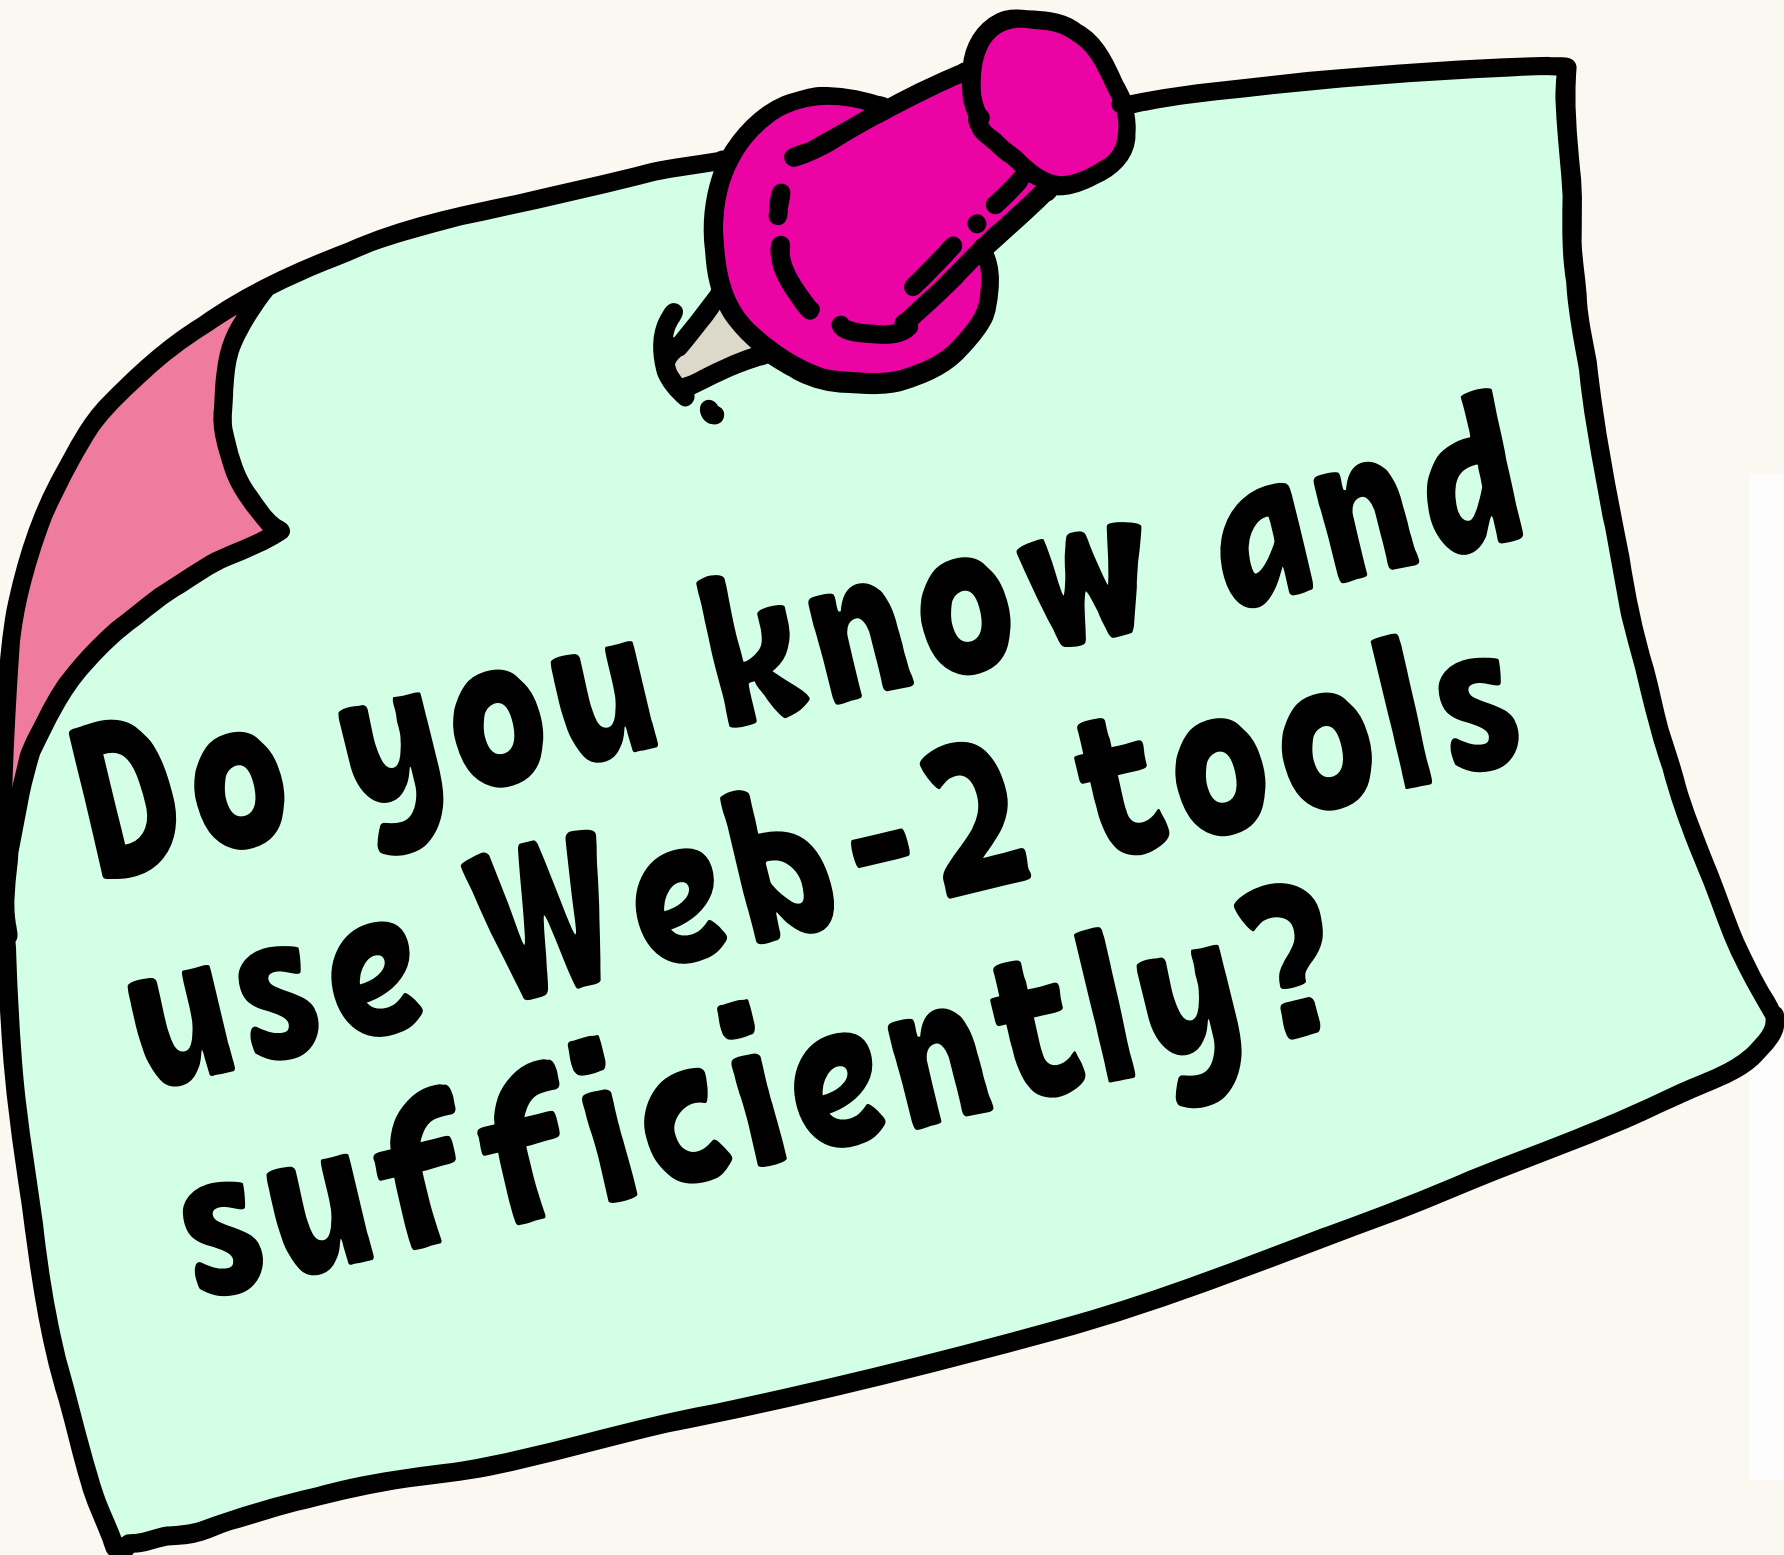

How do you think our project will improve you professionally and academically?

It's rewarding collaborate with teachers of other countries.

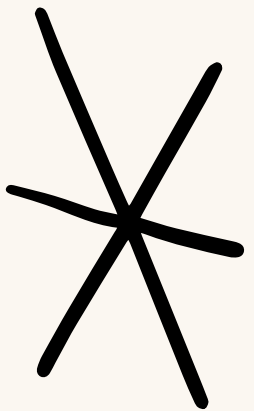

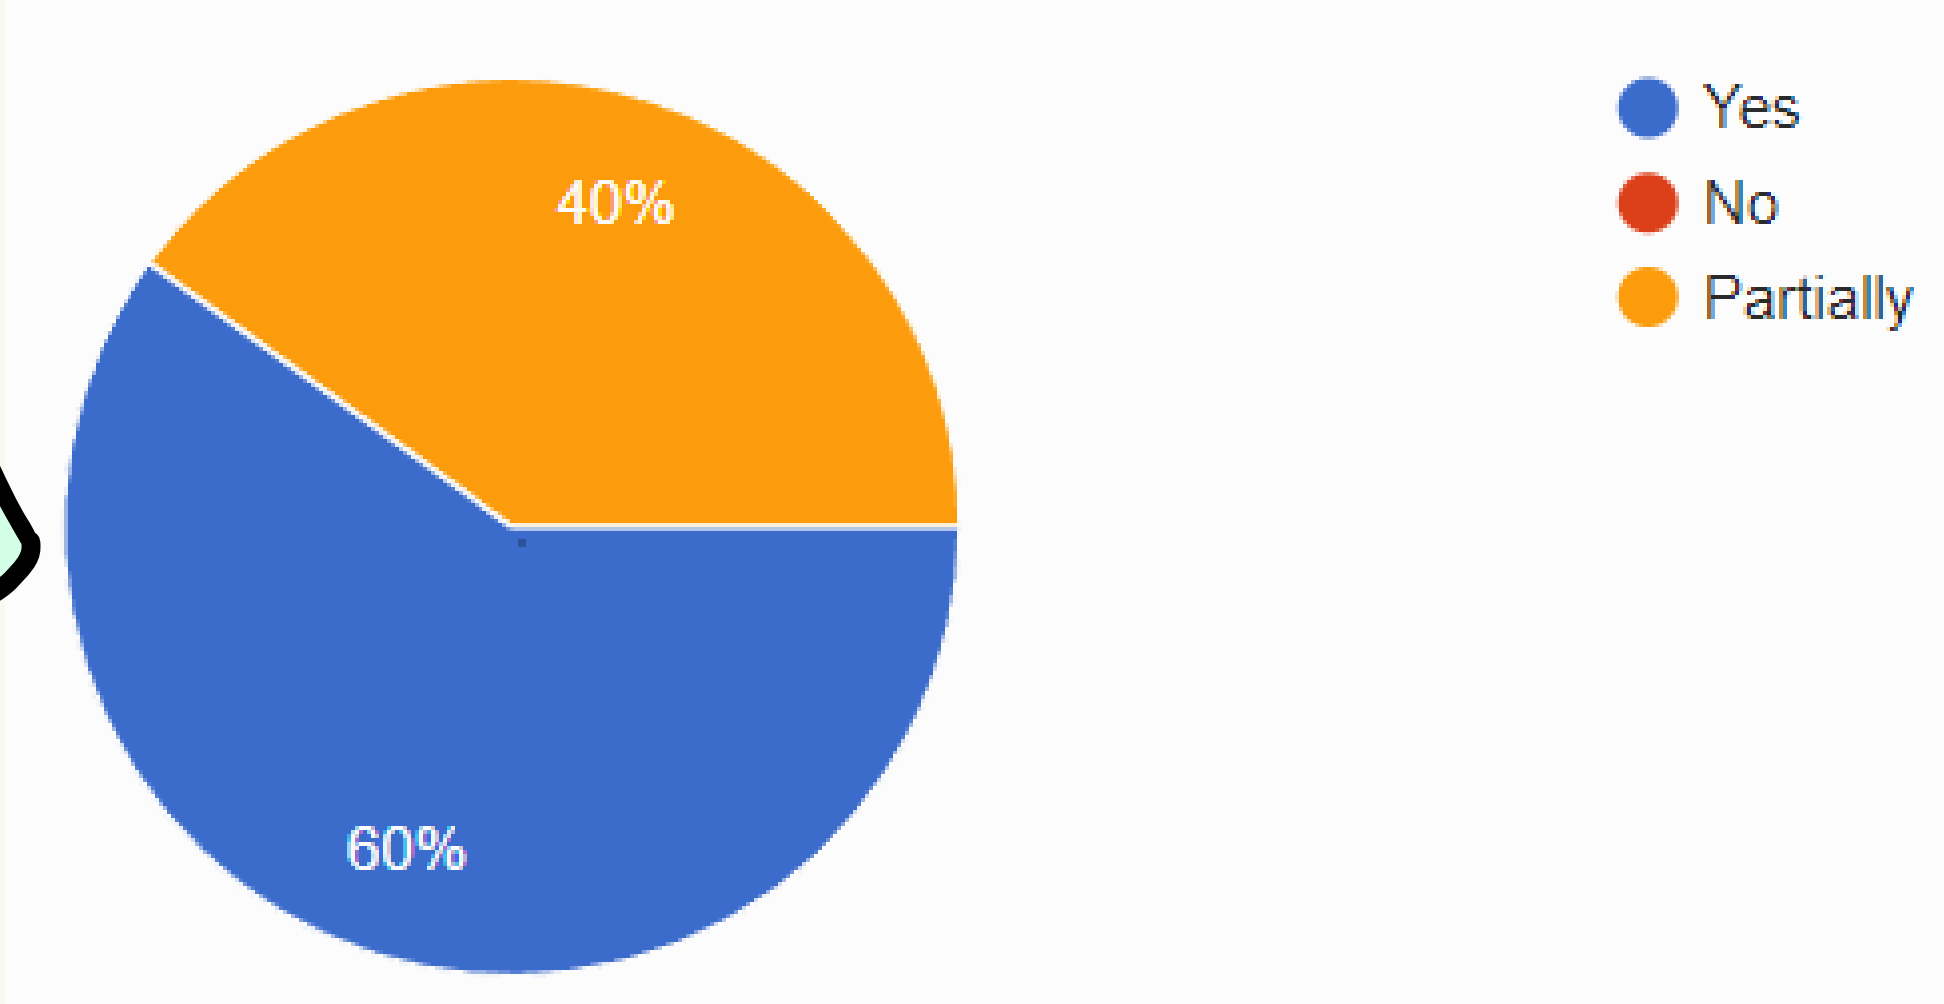

In a way the project will give me ideas to include in my lessons

I think I will gain experience about the eTwinning project process. And I believe that I will gain practicality in using mathematics programs.

I have known some tools I didn't that I will be able to use in the future with other students.

Do you know and use Web-2 tools sufficiently?

Are you happy to be a member of you our project?

I am definitely very happy

Yes! I would be more participate but I had studied!

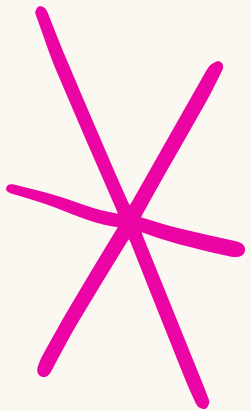

Of course

Yes

Yes, My students and I are very excited about the project.

WHAT ARE YOUR GENERAL EXPECTATIONS FROM OUR PROJECT?

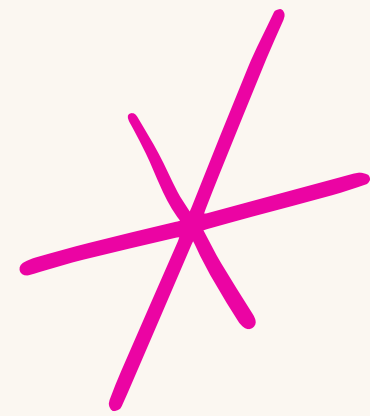

I expect to collaborate with teachers from other countries so that i can have an idea of the differences and the similarities in our practice of teaching mathematics

I hope my students enjoy the experience and realise about the importance of knowing a foreign language to communicate easily with people from other countries.

I Hope to continue and grow up this project!

I think it will be a beautiful and high quality work, good luck to everyone.

I guess that we will get along well with our partners, design fun games and have a lot of fun during the project.
